SCHOLPP Services

Experts in whatever
you need.

With our extensive experience in every industrial sector and constantly growing expertise, we set out to conquer new challenges every day.

Whether your project is on an extra-small or extra-large scale, whether it's specialized or unique, we can find a solution that's a perfect fit. Because here at SCHOLPP, our maxim is: effectiveness and cost-effectiveness.

Pick and choose the services you need from our modular system. You can use SCHOLPP to provide one-off specialist services, or as a general contractor with overall responsibility for a large-scale project.

Worldwide industrial installation, machine transport and plant relocation services

Any machine, anywhere.

We carefully dismantle your systems, transport them to their new locations and reassemble them with expert precision.

If you need to relocate an entire production facility, we can provide a comprehensive range of technical equipment, specialist staff and our decades of experience in complex logistics processes – and we can even work while production is still running.

• Customized service packages:

Consulting, dismantling, transport logistics, installation, commissioning and production readiness

• Flexible machine upkeep:

Comprehensive servicing and maintenance of machines and systems

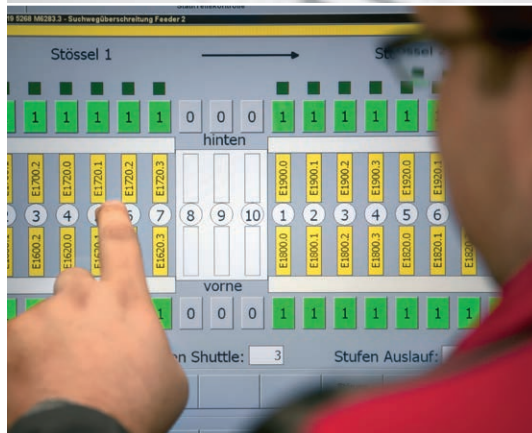

• Experienced specialists:

Teams of mechanics, machine fitters, mechatronics engineers, electricians, electronic technicians and electrical engineers, all specially trained on your machines and sectors

• Global service:

Worldwide logistics, including customs duties and other formalities

You plan your production line. We plan your relocation.

Press engineering, modernization and optimization

NEW

Our formula for keeping your presses at peak performance.

PTC PressEngineering in Oberhausen is your first port of call if you want to maintain or enhance the performance of your metal processing presses.

With targeted modifications, we can often improve the performance of existing plant to up to 85% of that of a brand-new press – but at a cost of around 30% of the new purchase price.

• Cross-sector expertise:

Press checks and press repairs, from engineering to installation

• Longer machine life cycles:

Press modernization, performance upgrades and automation to tight time frames

• Fast reaction times:

Manufacturer-independent replacement parts, repairs and servicing for all machine types to the most rigorous quality standards

• Highest safety standards:

Press safety and CE certification

• Flexible assembly lines:

Electrical and mechanical automation, modifications and retrofitting of machines and production lines

• New controls for greater efficiency:

Programming and installation, including visualizations

PTC PressEngineering – Your press specialist.

Technical cleaning and maintenance to DIN 31051

NEW

Clean systems, smooth processes.

At the heart of any successful value creation chain lies efficient equipment. As specialists in DIN 31051-standard technical cleaning and maintenance services for complete industrial systems, SCHOLPP helps you achieve continuous modernization and efficient production.

We take a comprehensive approach to process optimization: from machine functionality and improving your technical infrastructure to training your teams. Our focus is always ensuring 100 percent uptime for your plant.

• Increased productivity:

Integrated maintenance concepts, ensuring system availability

• Greater precision:

Preventative maintenance in line with the latest engineering standards

• Lower investment costs:

Continuous modernization instead of expensive outlay on new plant

• Reduced operating costs:

Qualified maintenance of supply equipment

• Clean production:

Technical cleaning services for highly complex systems

SCHOLPP services – The key to higher efficiency.

Maintenance, repairs and replacement parts for injection molding machines

NEW

Thinking ahead to achieve 100 percent equipment availability.

Plastic products are firmly established in growth markets around the world. Our hugely experienced employees know plastics processing machines inside and out. As a well-respected partner of the plastics industry, SCHOLPP maintains more than 600 machines in Germany and around 220 systems worldwide.

• Optimized production, right from the start:

Commissioning new installations, relocations or production optimizations

• Efficient processes:

Optimization of manufacturing equipment for technically complex products

• Flexible production:

Dismantling, transport logistics and reassembly, right through to commissioning and production readiness

• High machine availability:

Preventative maintenance and servicing of injection molding machines throughout the entire life cycle

• Just-in-time resources:

Servicing, repairs and supplies of replacement parts

We keep your production line flexible.
