

SCHOLPP

— Worldwide Industrial Installation —

We keep
industry
moving.

SCHOLPP

— Worldwide Industrial Installation —

SCHOLPP – The service provider for
global industrial installations.

Our range of services comprises dismantling and
reinstallation, modernization, and commissioning of
machines and complete production systems.

And if you have a particularly unique request,
we can handle that too.

SCHOLPP – A promise for quality.

Movement.

We keep industry moving.

Wherever the path of our customers takes them, we are on hand to make sure that they stay flexible in their business. Drawing on over 66 years of experience and our expertise in finding technical solutions, we make efficient and economic use of cutting-edge technology in every task. Our combination of superb performance and tremendous depth of service results in immense value: in the end, the satisfied customer starts their production systems on time.

Future.

Looking ahead today. Thinking ahead tomorrow.

Value for the customer doesn't happen on its own; rather, it is the result of smart foresight and consistent action. We have a picture of what the future should be, and a vision for our company. Our strategy is geared towards maintaining our viability in the future. You need to be robust if you want to be successful in fast-moving times.

The SCHOLPP brand focuses directly on our core business and on building up our market leadership. This requires a high degree of perseverance across the entire team. All our attention is channeled towards ensuring an efficient company structure.

To do this, we continually adapt processes to meet growing requirements on installation sites around the world, which are driven by digitalization and automation needs, safety regulations, and environmental protection. Firstly, this demands a willingness to pursue intelligent project management. And secondly, we send our employees to the SCHOLPP Academy to ensure they are equipped with the skills they need to keep developing as professionals.

Challenge.

Get out of your comfort zone.

Say yes to the job.

The industry has become extremely dynamic and agile. It is being transformed by digitalization at breathtaking speed. SCHOLPP accepts the challenge presented by this economic dynamism. Thanks to our industry insight, our technical knowledge and our expertise in installation, we have the skills to come up with fresh new solutions for complex assignments.

SCHOLPP was founded by Alfred Scholpp as a family-run business in 1956, and that's how we've stayed. This has created a stability that persists even in changing times and a volatile business climate. The dedicated attitude of our installation teams, the organizational reliability of our planning, and the top-notch performance of our technology means that we are able to take on any task and conclude every project successfully.

Foundation.

Keep your feet on the ground.

Keep growing long-term.

Values create a firm foundation for us to act on. Openness, diversity, continuity – that's what our perception of ourselves as a company is built on. This gives us the stability to act with confidence even when times are tough, and to keep evolving over the long term.

Openness: Employees for every skill.

Well-trained staff approach new tasks with confidence and an open mind. That is why we foster a culture of openness and communication in our team so that we can keep on adapting to new technologies, new production contexts, and new industrial environments.

Diversity: Equipment for every task.

If you promise your customers that you're ready for action anywhere, anytime, you need to be prepared with the right equipment and a host of different solutions. Whatever we need for a project, we're sure to have it in our fleet of equipment, or, if not, we can organize it at a moment's notice.

Continuity: Quality for all time.

We strive to provide a high level of quality and safety at all times. The best technology and capable staff guarantee this. This is the reason we enjoy a leading position in international installation, and we work enthusiastically to maintain this day in, day out.

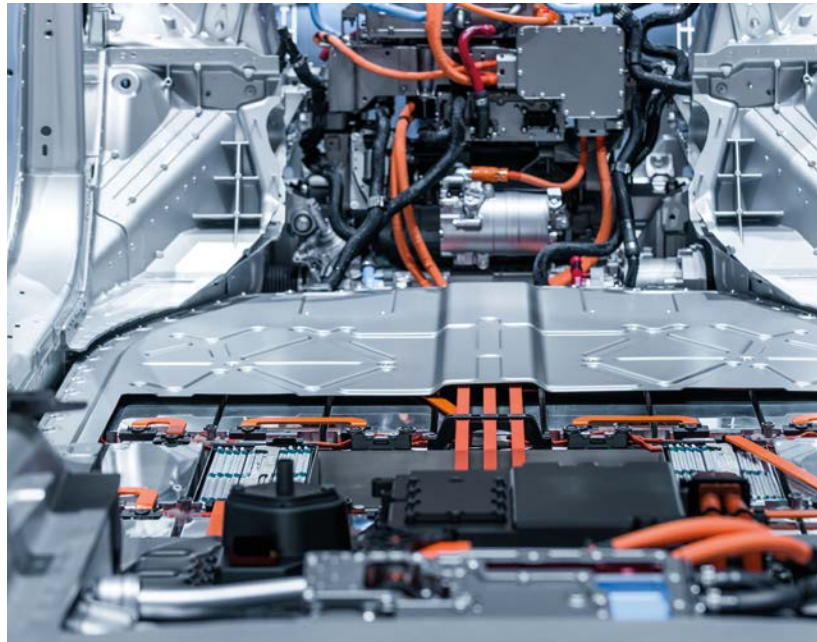

Strengths that come from values: 66 years of expertise in technical solutions based on the tenet that we must come through for customers using capable teams, state-of-the-art technology and optimum quality.

***The automobile industry as we know it:
The vehicle crankshaft is a symbol of the high-precision production
of combustion engine components. For decades, we have been
moving presses, forming technology, and machining centers.***

***The automobile industry is in flux:
New vehicle designs with electric drives
and batteries are entering the market.
Production technology and factory
layouts are seeing major change.
We are on a learning curve
together with our customers.***

Trailblazer.

Seize the opportunities. Lead the way.

The world keeps on turning, trends change our lives. So it's important to remain able to act. SCHOLPP is ready to take the initiative. By strategically developing our services, we aim to play our part in shaping the industry.

Next to electric drives, digitalization is becoming a core business of mobility: self-learning operating systems with permanent data exchange, new individual microchips, and additional intelligent features such as self-driving and smart charging infrastructure. Intelligence has made its way to the car, giving rise to new manufacturing technologies.

It's precisely during this time of economic upheaval that we as an industry service provider open the door to key innovations. Armed with our installation know-how, we join forces with our customers to build high-performance production facilities and value creation chains for the future.

*SCHOLPP is a service provider for industries in flux:
We use production-related installation solutions to meet the
challenges faced as a result of digitalization and automation
in the industry.*

Business management.

Resolute. Pragmatic. Fast.

Remaining true to our word, making swift and pragmatic decisions, and leading with credibility – SCHOLPP's senior management lives and breathes these principles. They all put their names to it: company owner Wolfgang E. Mueller as well as Managing Directors Lars Gerlach and Steffen Kühn.

Wolfgang E. Mueller

Steffen Kühn

Equal footing.

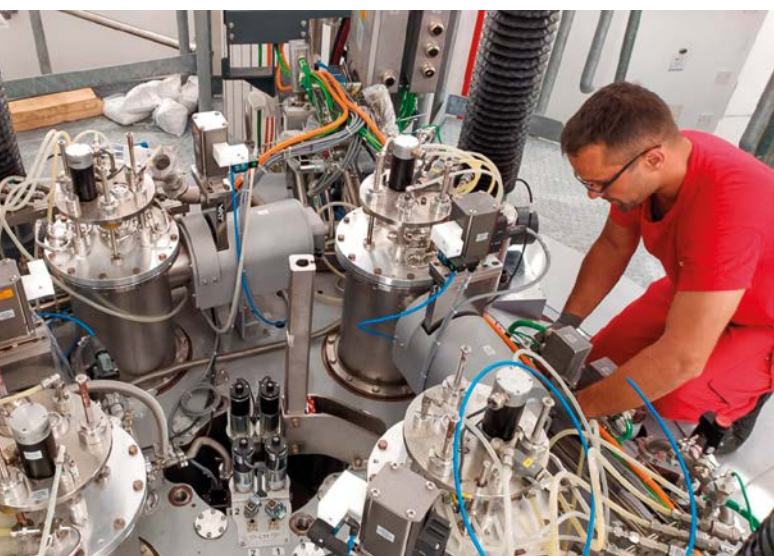

Difficult questions.

Surprising answers.

SCHOLPP is a reliable partner for high-caliber industry services. The success we achieve for our customers is based on the quality of our consulting and planning, our engineering, and our project management. We therefore set ourselves a high standard: absolute professionalism.

Our management is all about close dialog with customers, and guarantees extraordinary solutions, rigorous organization, and a high degree of economic efficiency. No question goes unanswered, no matter how tricky it may be. We keep this promise by being meticulous and cooperative.

Passion.

We are proud to work wonders.

Our team pledges to deliver the best service at all times. This involves a lot of expert knowledge and personal commitment, a lot of flexibility, and a lot of motivation. Something special shines through our work: incredible versatility. Not everyone is capable of that.

Our fitters move complex systems and challenging machines in extraordinary places all around the world – day or night, hot or cold. This is only possible through genuine teamwork. Our professional self-image matches our mindset: diversity equals happiness.

Done.

***The machine is in place and the drive axles have been adjusted.
All media have been installed and the system is ready to go.
The production hall is clean. Our work is done.***

Responsibility.

We keep our word.

All SCHOLPP employees are obliged to observe a strict code of conduct. What we promise to do, we do: within the company, for our customers, for our environment.

- 1. We follow international compliance standards regarding honesty and fairness in our global economic business relationships.**
- 2. We abide by high standards in occupational safety and health management for our employees and customers. Our in-house safety engineer monitors compliance with all regulations.**
- 3. We meet comprehensive social employer standards: we champion a culture of welcome and tolerance, we show appreciation and offer performance-related remuneration, and we also offer bespoke further training at the SCHOLPP Academy.**
- 4. We are gradually working to minimize our consumption of resources in our services and our fleet in order to protect the environment.**

Four pillars of sustainability:

- **Transparency and compliance**
- **Maximum occupational safety**
- **High social standards**
- **Resource conservation**

*Always up-to-date:
At the SCHOLPP Academy, we pool
our knowledge and pass it on
to our employees.*

The world's largest horse sculpture in Miami, a 100-ton cyclotron at a Singapore clinic, or a machine in Sydney, Australia: SCHOLPP transports and installs around the globe.

Global.

At home all over the world.

Our superb performance is everything. It's what puts us in such a strong market position, anywhere, anytime. As a service provider, we have branches around the world so we can act quickly, wherever we're required. To date, our employees have performed installation jobs in 50 countries around the planet.

Our installation teams are just as diverse as our services and fields of work: speaking 20 languages between them, our employees are truly international. If you want to be successful on the global stage, you need the ability to move around the world with cultural acumen.

Wherever you produce, wherever you supply - we will support you with capable, reliable teams. Whether you choose to move your machinery via heavy goods vehicle or rail, by plane or by ship, we ensure smooth transport for every journey.

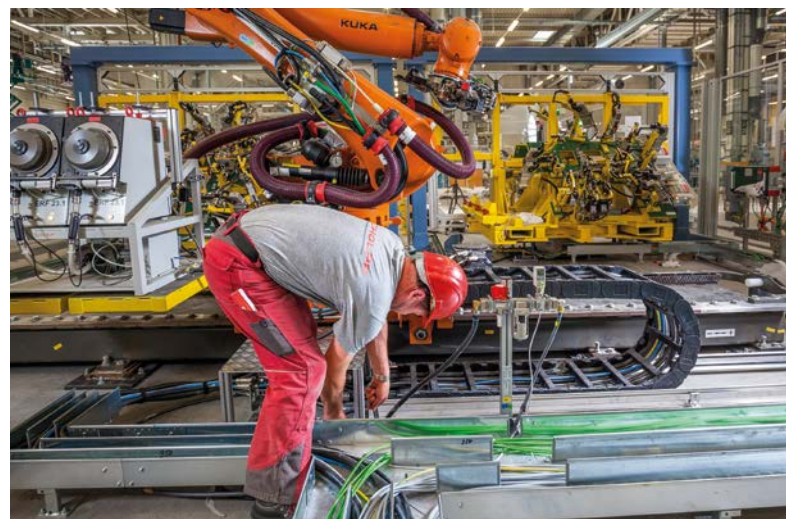

Versatility.

Great experience. Greater agility.

SCHOLPP is multi-faceted. Our strength lies in devising bespoke solutions for any industry, any size of company, and any project magnitude. This capacity springs from a wealth of industry experience and technical expertise that goes back over 66 years.

Whether it's a cleanroom, press shop, or printing shop, we know how to adapt quickly to the specific requirements of every sector in order to offer a complete custom solution. To achieve this, we transfer our experience into new sectors, thereby continuing to develop our expertise further.

Our portfolio comprises modular services for the customer to choose from: from single service to the full package. For us, the highest standards of efficiency and economic viability are of paramount importance. Installation and moving objects into place during ongoing production operations are a good example of this.

SCHOLPP special technology

Hydraulic gantries

Our powerful equipment is used to position heavy loads of up to 1,000 tons, even when space is cramped.

Lightweight gantries

Lightweight with a load capacity of up to six tons, for use in sensitive areas where the surface cannot take high loads.

In-plant cranes

Maximum maneuverability with a greater load capacity of up to 40 tons, with a compact design.

Forklifts

Compact special technology up to 23 tons with free lift for journeys involving a raised load, even with height restrictions.

In-plant heavy load trailers

Heavy-duty moving gear with high load capacity and low loading height, for indoor or outdoor use.

Transport trolleys

Small, strong and flexible, also suitable for sensitive production areas; self-driving up to 40 tons.

Additional special technology

Equipment.

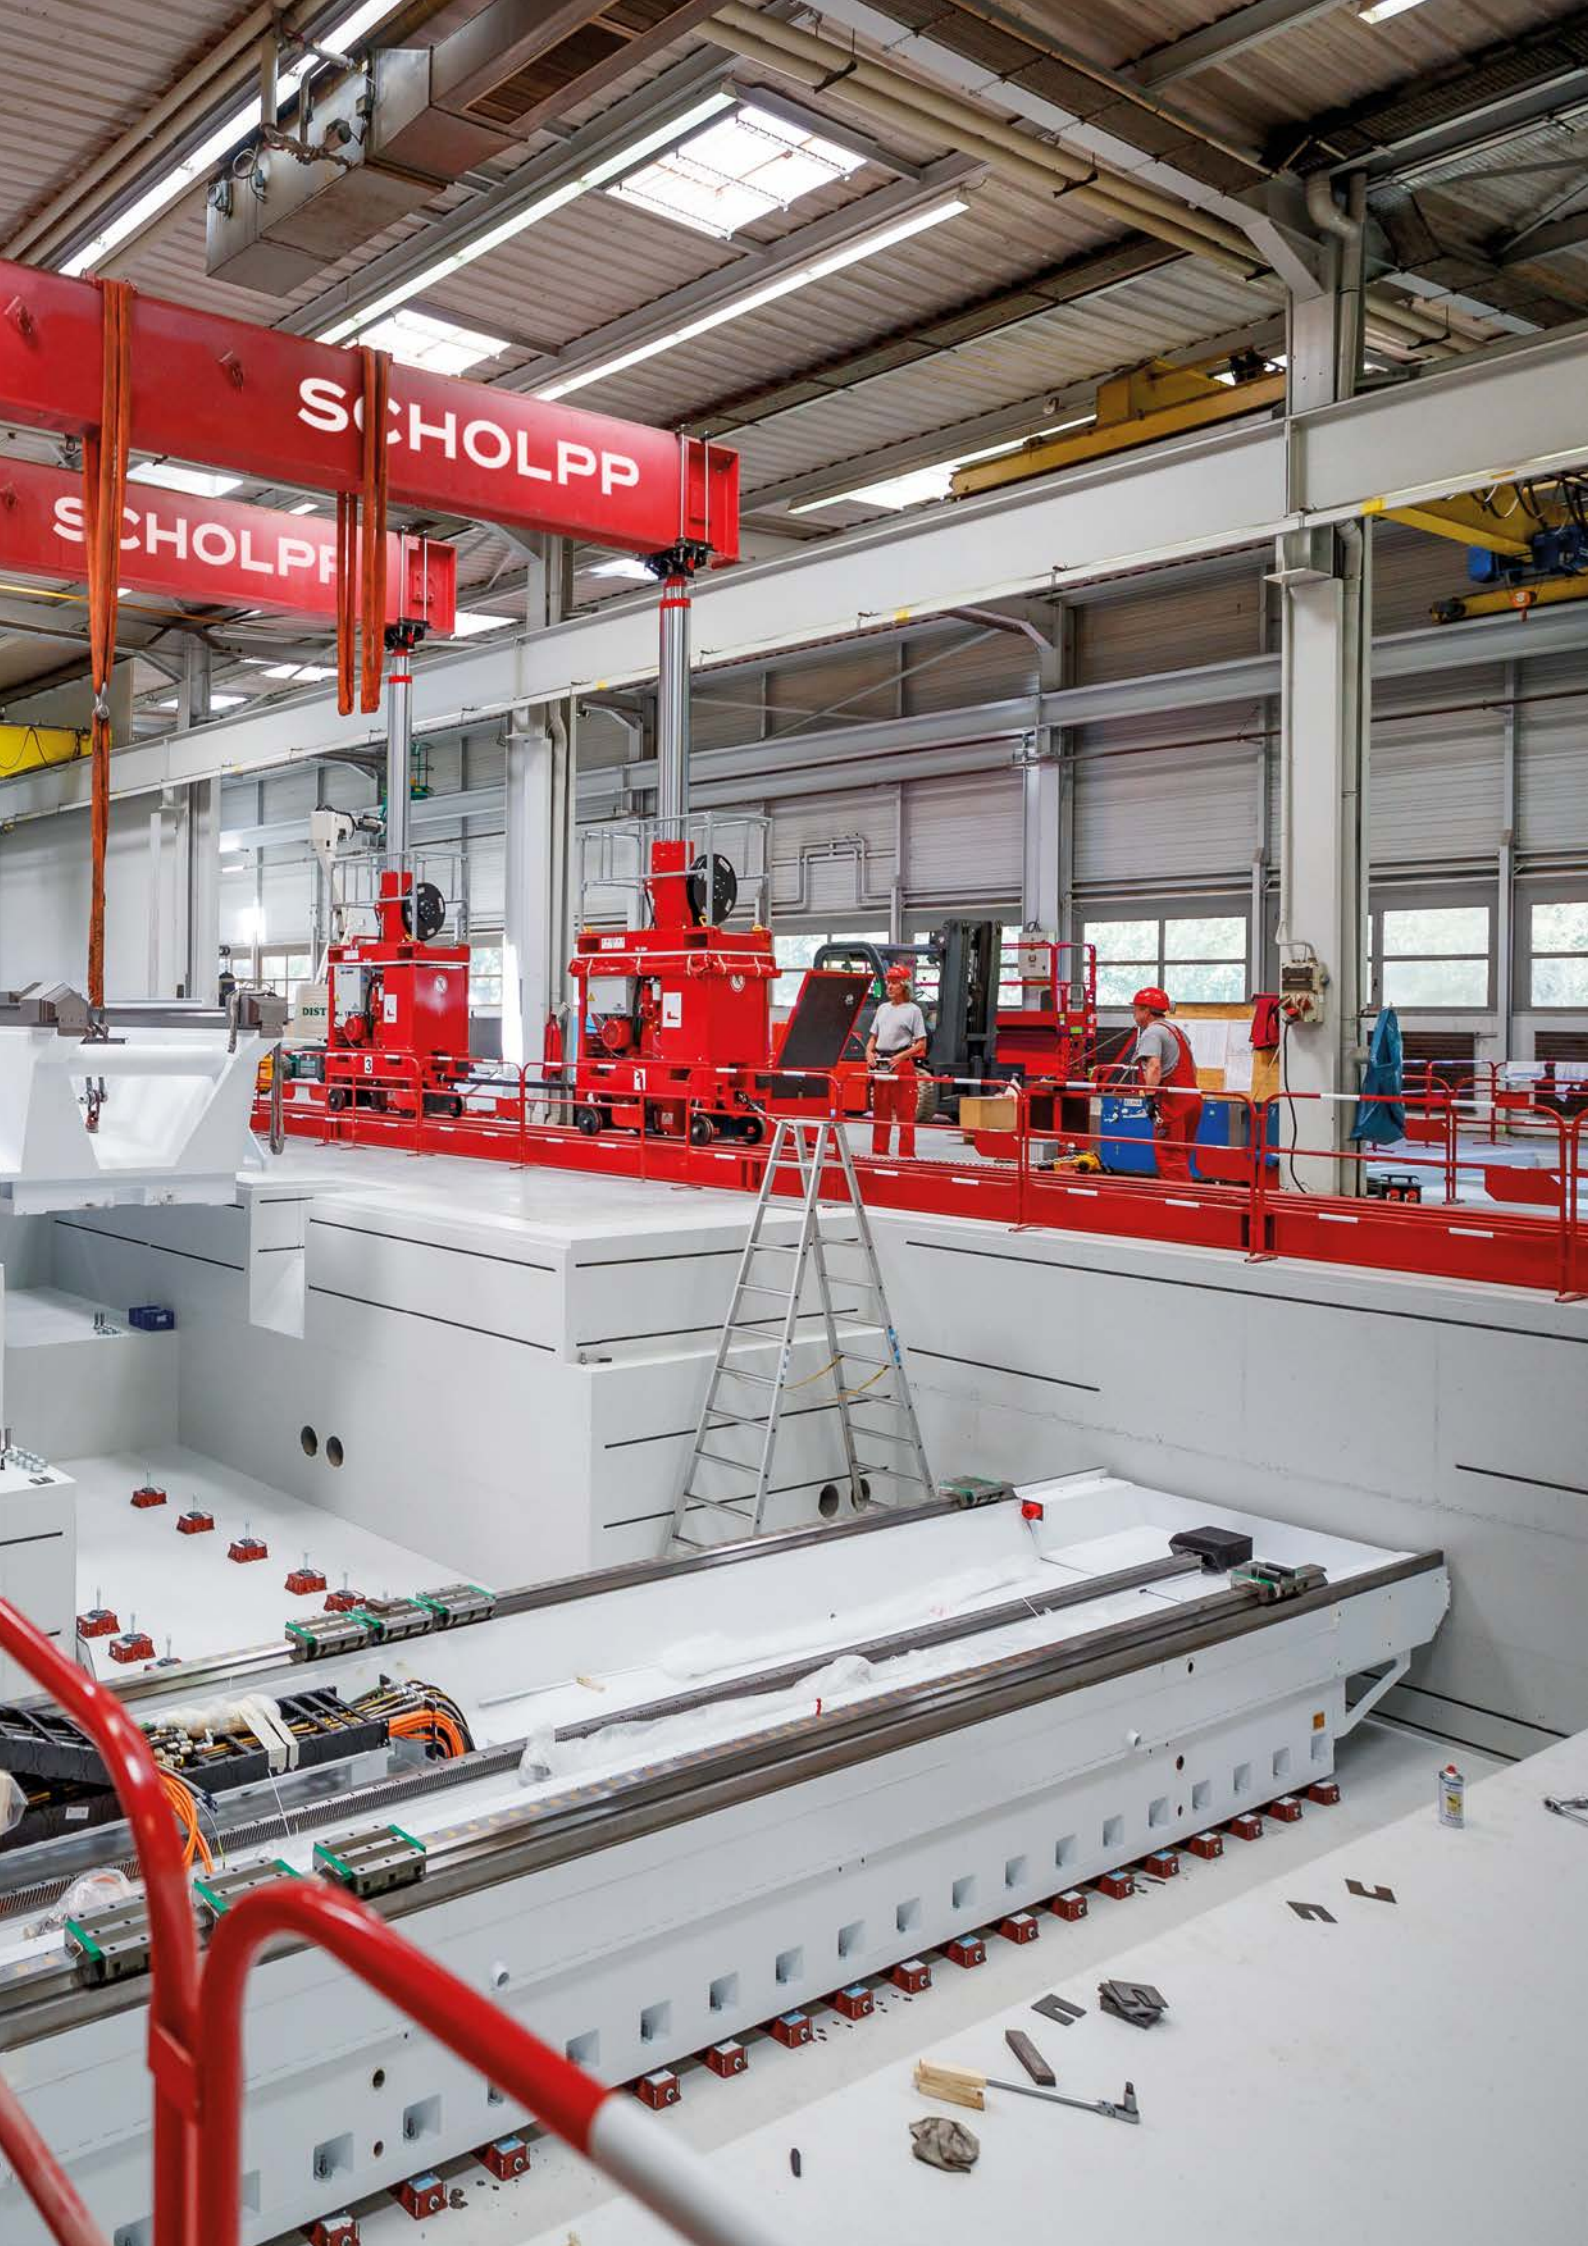

Strong tech. In good hands.

SCHOLPP's materials management covers the full range of installation and transport technology available on the market. To handle individual project assignments, we have special equipment at the ready, which is unique in Europe for its sheer variety. We possess the right technical solution for every requirement.

Installation and transport technology, however, is only as good as the people who operate it. Not only do we boast the best technology, we can also claim the best installation specialists, who are well-versed in this technology and know how to deal with it safely.

This is what it looks like when our tech is in use: We pick exactly the right equipment for each particular project from our wide-ranging fleet of machinery. For example, the precise positioning of heavy parts is best dealt with using our hydraulic gantries.

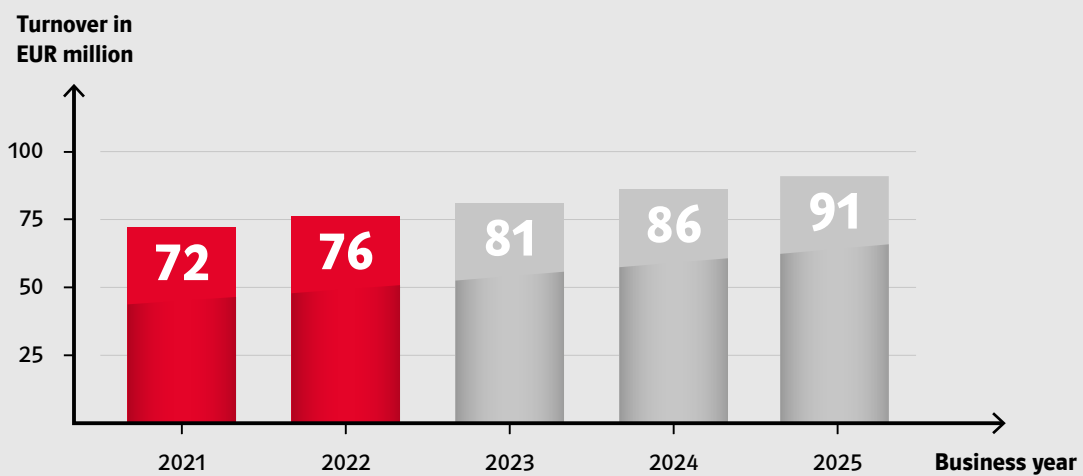

Road to success.

SCHOLPP: Our company.

Turnover and earnings performance are key indicators for our successful business strategy. We stand out for our resilience in the face of crisis. SCHOLPP aims to achieve a turnover of over 90 million euros by 2025, returning to pre-COVID levels. Special thanks must go to our highly motivated employees, both for what they have done and what they will do.

The dedication of every one of our 700 employees is vital for the success of our business, and that's bearing in mind 20,000 installation jobs and over one million hours worked per year. Each one has the ambition to meet these unique challenges head-on and harness our technology worth over 30 million euros to achieve a great result. And that's the way it's going to stay.

Together.

**Let's talk about
your plans for the future.**

SCHOLPP works in highly specialized fields, applying its technical expertise and many years of experience to master the challenges of its customers. Our name is synonymous with solutions. That's why we always act as an integral part of your business process. Our motto is: Become one with your customer's task - anytime, anywhere. We're there, wherever you need us.
